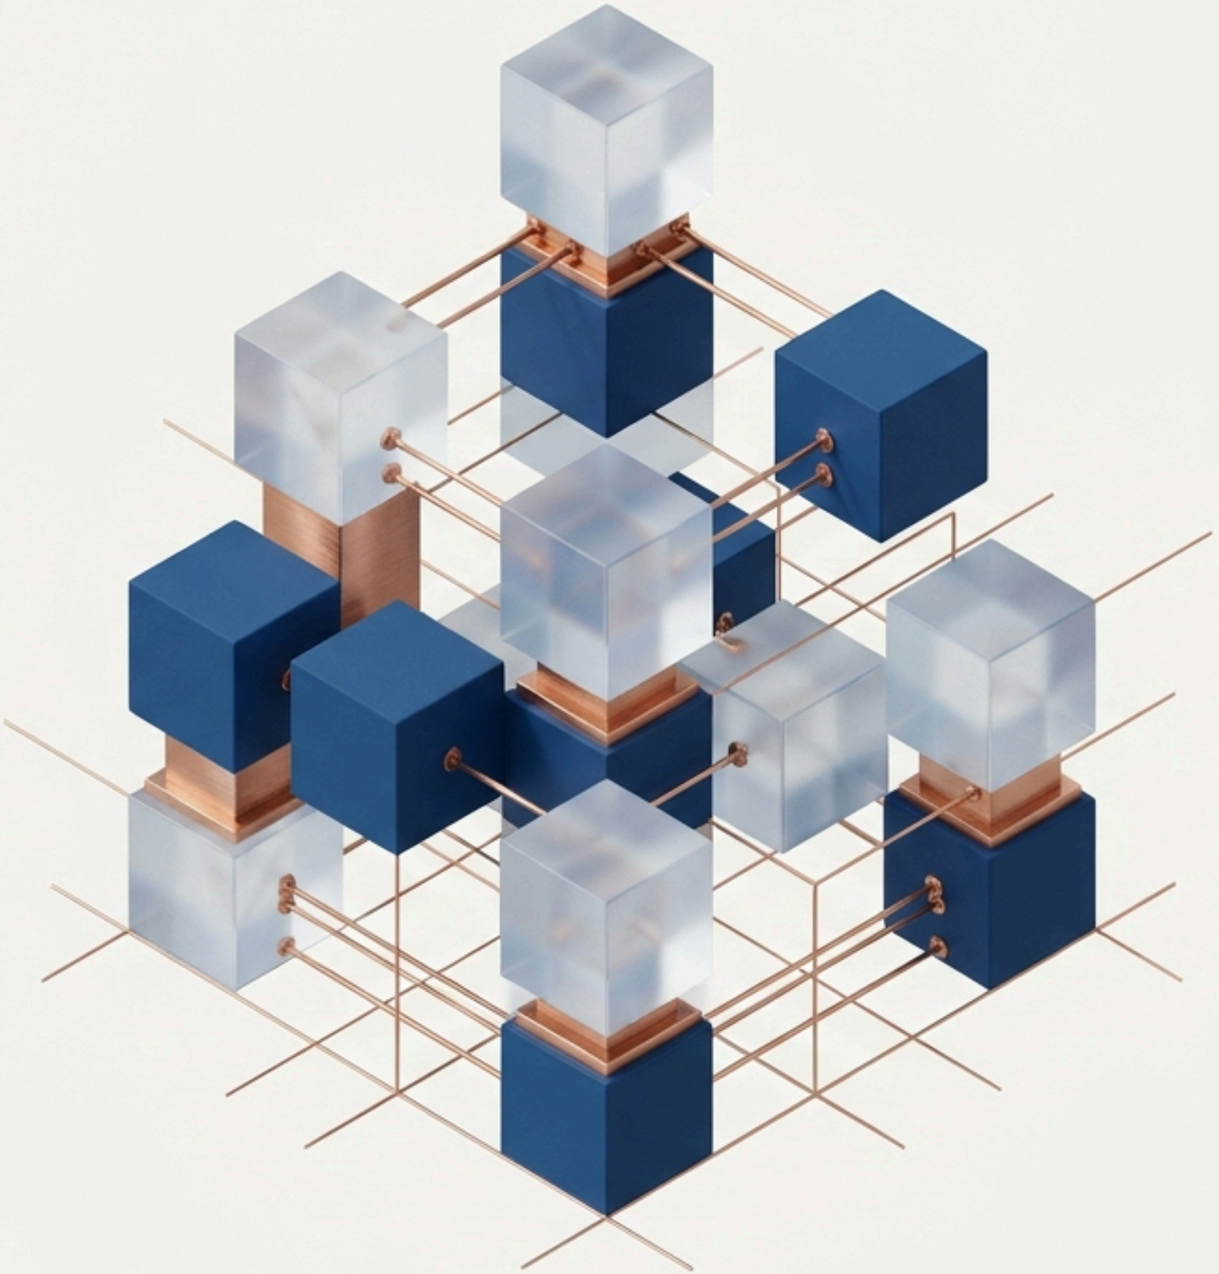
Your Growth Partner in Technology.

We don’t just build software — we build capability, confidence, and competitive advantage through custom enterprise solutions.



Aadi IT Services

ISO 9001:2015 | ISO/IEC 27001:2022 | CMMI Level 3 Certified

Gemini Notebook

Off-the-shelf software is designed for thousands of businesses, not yours.

Workflow Friction

Forces your unique company operations into rigid, predefined processes, causing manual workarounds.

Scalability Roadblocks

Fails to natively support future users, new business units, and expanding customer demands without complex, patched integrations.

The Licensing Trap

Locks the business into recurring licensing limitations without ever granting complete ownership over features or data.

The biggest cost of generic software isn't the subscription—it's the competitive advantage left on the tabl

Gemini Notebook

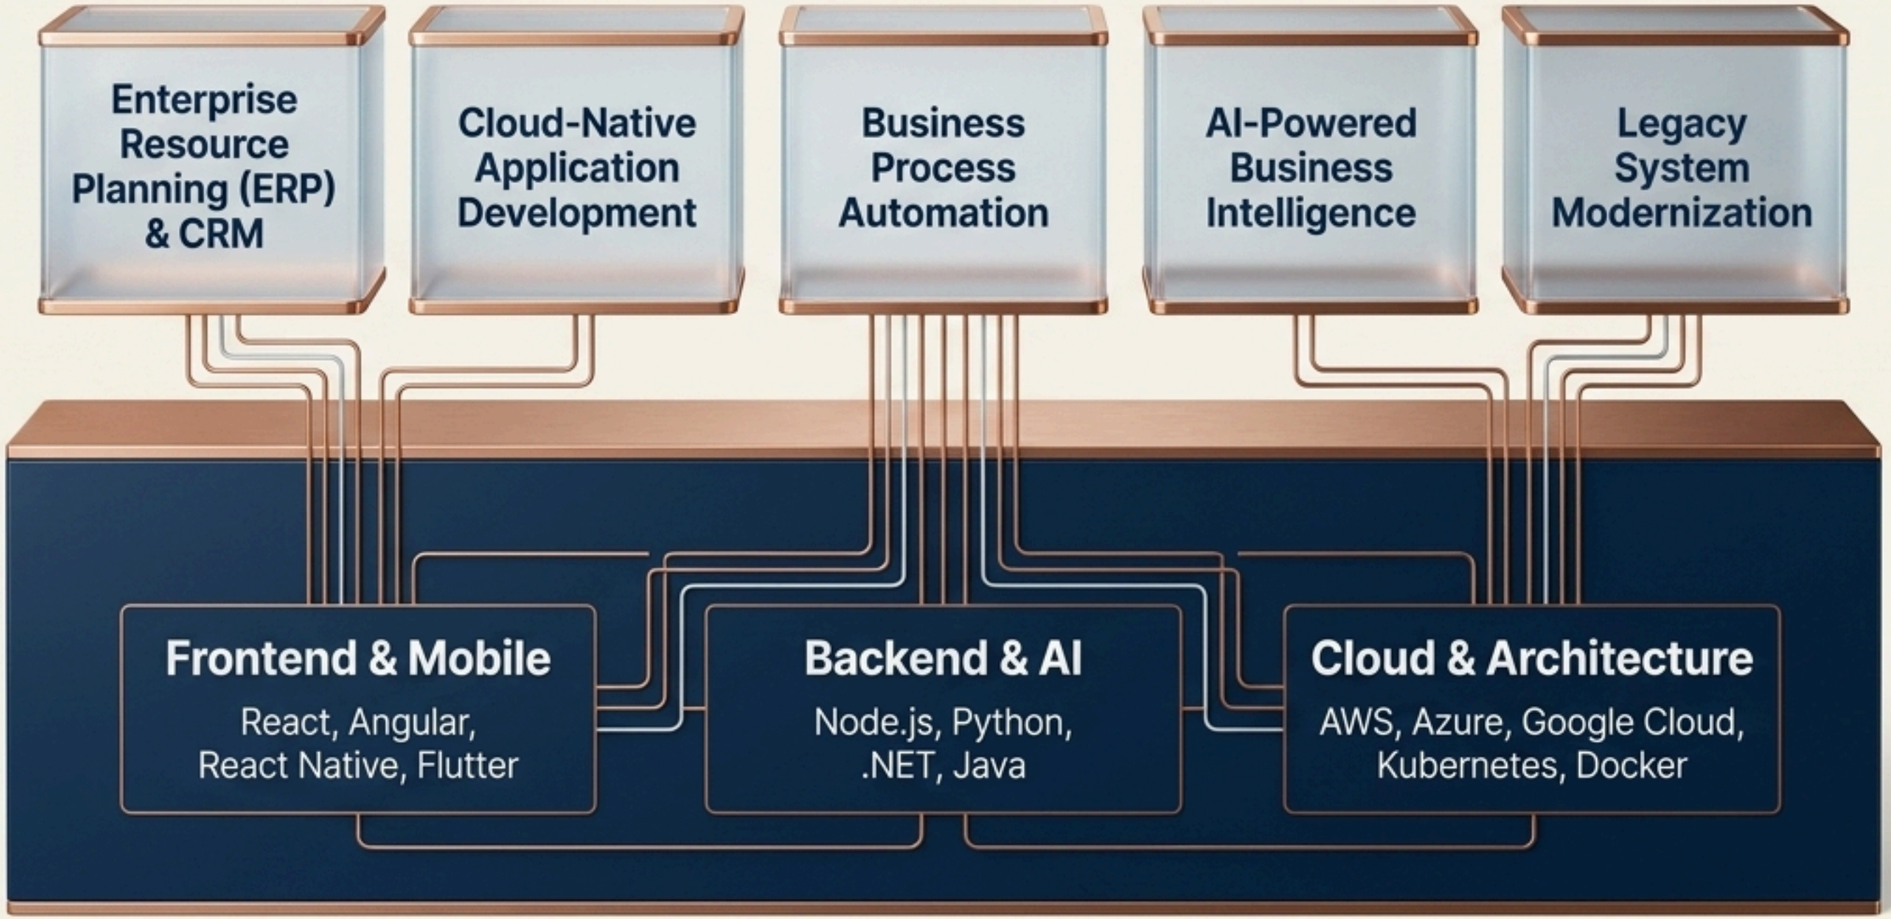
The Build vs. Buy Diagnostic Matrix

	Generic Software	Custom Built
Core Philosophy	Rented & Mass Market	**Owned & Tailored**
Operational Fit	Business must adapt to the software	**Matches exact workflows and business logic**
Security Posture	Mass-market attack surface	**Tailored to infrastructure with specialized compliance**
System Integration	Relies on generic APIs and workarounds	**API-first architecture designed for existing enterprise systems**
Business ROI	Ongoing, expanding recurring fees	**Capital asset driving time saved, increased sales, and reduced manual errors**

A custom application eliminates recurring licensing limitations and adapts to changing business needs

Gemini Notebook

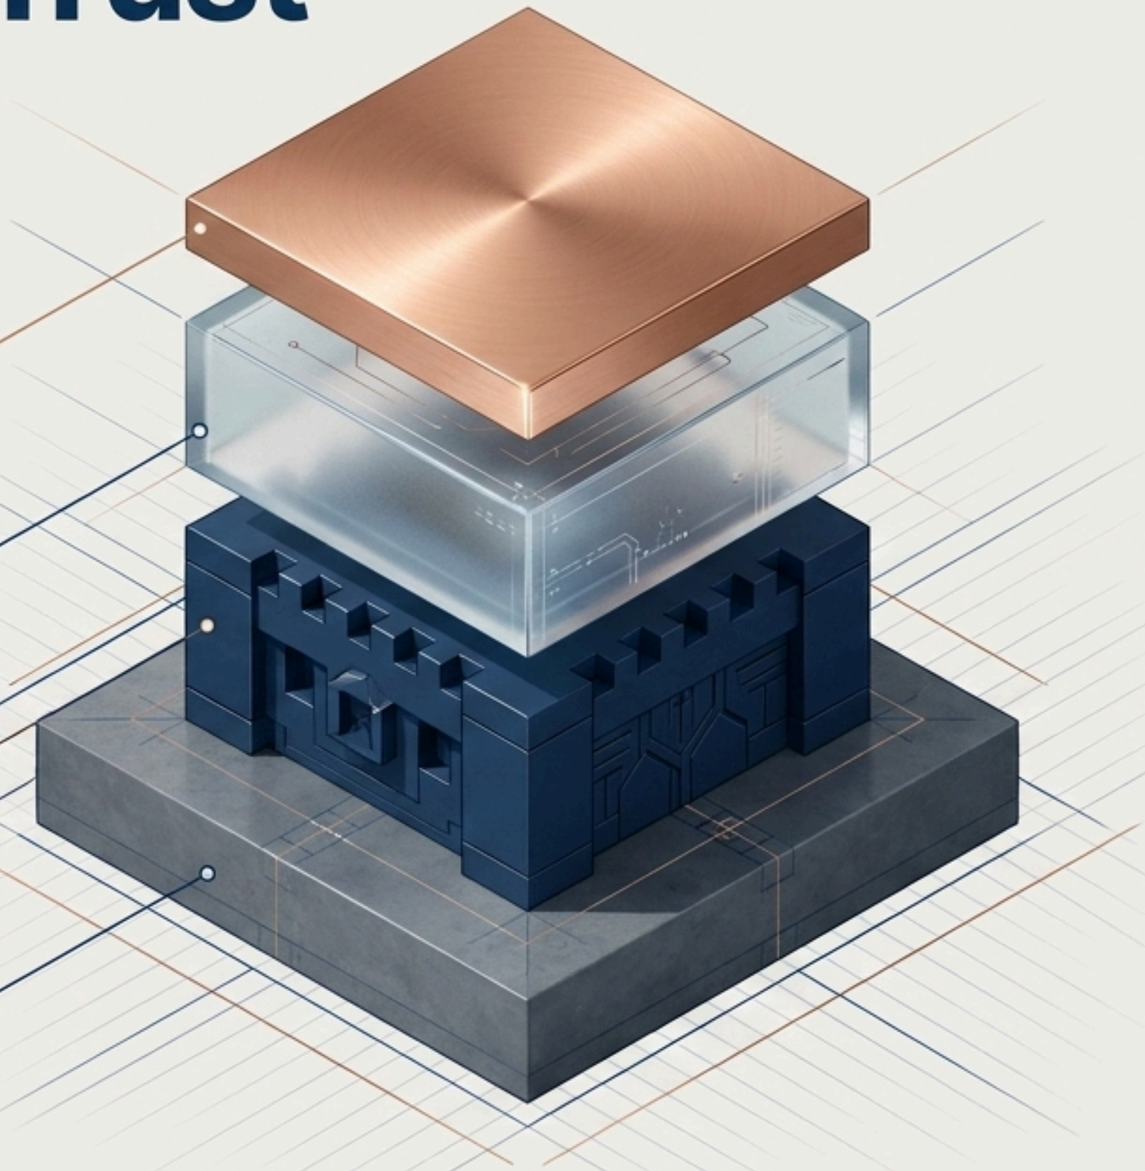
Engineering Scalable Enterprise Operations



Gemini Notebook

The Architecture of Trust

A smaller attack surface built specifically for your infrastructure is inherently more secure than mass-market software.



Certified Expertise

- ISO 9001:2015, ISO/IEC 27001:2022, and CMMI Level 3

Industry Compliance Level

- Adaptable and ready for HIPAA, SOC 2, GDPR, or PCI DSS

Access & Protection Level

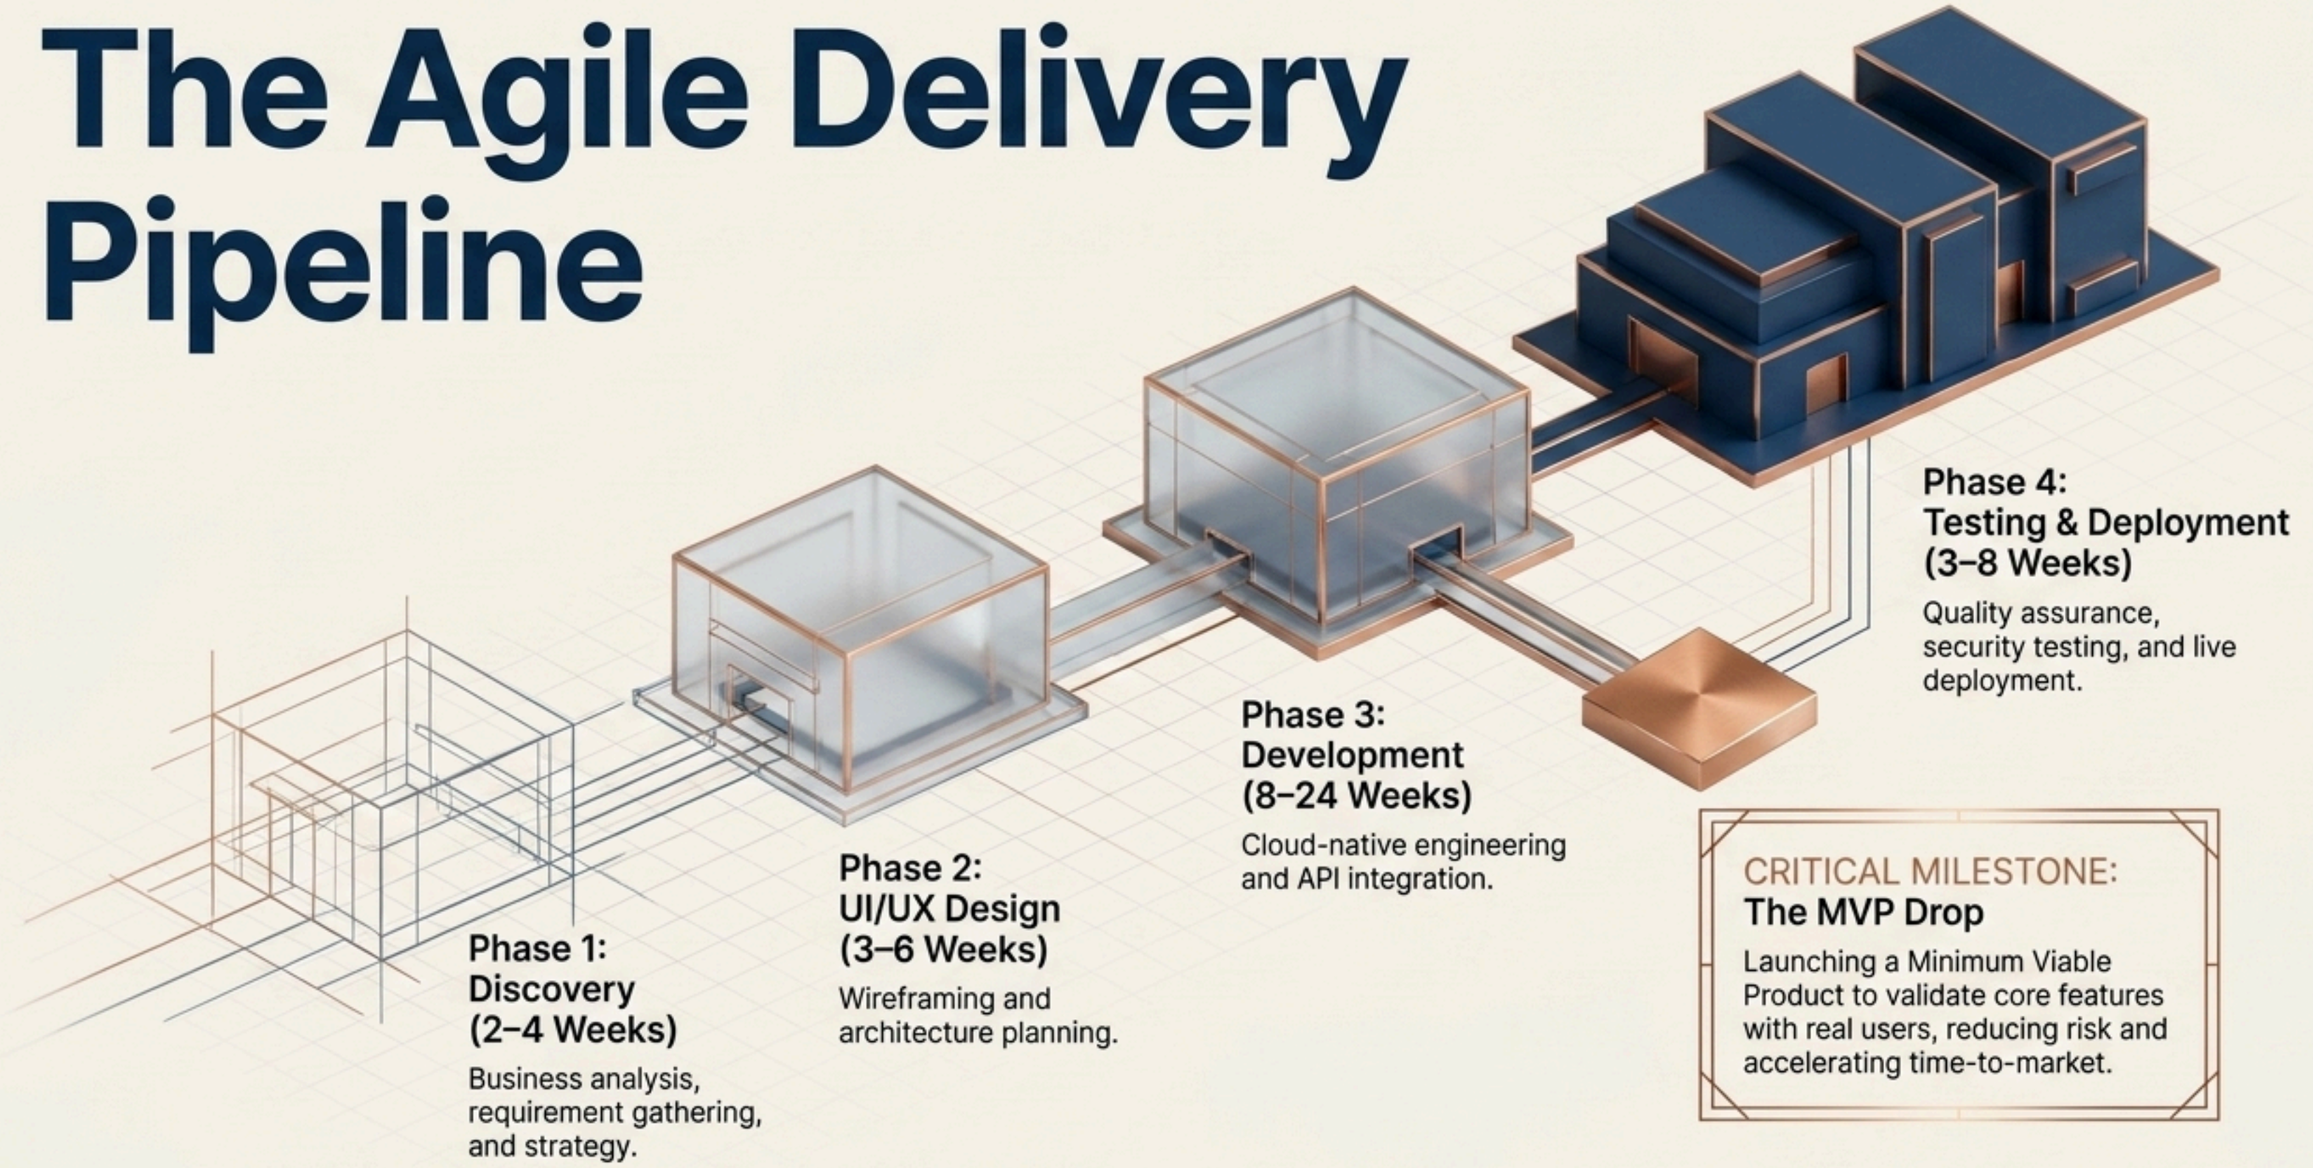
- Advanced Encryption, Multi-Factor Authentication (MFA), Role-Based Access Control

Infrastructure Level

- Secure APIs, Cloud Monitoring, Data Backups, Disaster Recovery Planning

Gemini Notebook

The Agile Delivery Pipeline



Phase 1:
Discovery
(2–4 Weeks)

Business analysis, requirement gathering, and strategy.

Phase 2:
UI/UX Design
(3–6 Weeks)

Wireframing and architecture planning.

Phase 3:
Development
(8–24 Weeks)

Cloud-native engineering and API integration.

Phase 4:
Testing & Deployment
(3–8 Weeks)

Quality assurance, security testing, and live deployment.

CRITICAL MILESTONE:
The MVP Drop

Launching a Minimum Viable Product to validate core features with real users, reducing risk and accelerating time-to-market.

Our Agile methodology enables faster releases, lower project risks, and continuous testing.

Gemini Notebook

We don't just build. We grow with you.

Performance Monitoring

Real-time cloud infrastructure management.

Security & Compliance

Continuous security updates and bug fixes.

Launch day is not the finish line. It is the beginning of a continuous growth cycle designed to drive sustained business results.

Scale & Expansion

Adding users, features, and integrations without rebuilding.

AI & Feature Enhancements

Iterating the product based on user analytics and market demands.
